

BX25 Weighing Terminal

For weighing processes and applications

Main Features

- IP67 protected for wet, hygienic and harsh areas
- 2 platform connections & total scale
- Color changing display, SmartBar & 16 digit alphanumeric info line
- User programmable 3 keys and 2 touch free keys for applications
- Data entry via barcode reader

High Technology & Performance

- Up to 999 999 display resolution
- Up to 800 conversion per second
- Application based SmartBars
- Changing color for prompting
- High capacity tank scales supported by eCAL electronic calibration & span correction of non-empty tanks

Typical Applications

- Weighing and data collection
- Customized labelling with barcode
- Counting by sample & APW memory
- Classification & Checkweighing at weighing and counting, filling
- Livestock and dynamic weighing with strong filters and algorithm

6 Memories Each With 500 Items

- 2 pcs ID1 & ID2 identification data
- Preset tare to enter specific tare
- Limit values memory for weighing and piece counting
- APW - Average piece for counting
- Item limits for check weighing and for classifying of packages
- Automatic memory linkage to IDs

Integration & Connectivity

- Profibus, Profinet, CANopen, Ethernet TCP/IP, EtherNet/IP, EtherCAT, CC-Link, Powerlink, Modbus RTU, Modbus TCP, Analogue output with Digital I/Os
- 2 opto isolated RS232C and RS485 serial ports and Ethernet TCP/IP are standard
- Mini USB port

BX25 is a high accurate, multifunctional weighing terminal which is used in wet, hygienic and harsh industrial areas. It can be connected to two weighing platforms and it has total scale.

This weighing terminal can be programmable for weighing, labelling, checkweighing, classifying, filling, piece counting and dynamic weighing applications. Three user programmable keys and two touch free keys can be set for user applications to provide practical and error free operation. The instrument has 6 pcs memories; ID1, ID2, preset tare, APW, item limit values; each have 500 records capacity.

BX25 has important features for process weighing; strong calibration alternatives including electronic calibration (eCal) and various integration interfaces with PC or PLC via RS232C, RS485, Ethernet TCP/IP, Fieldbuses such as Profibus, Profinet, CANopen, EtherCAT, CC-Link, Powerlink, Modbus RTU, Modbus TCP, EtherNet/IP, Analogue output, Parallel I/Os.

BAYKON
Industrial Weighing Systems

Typical Applications

1. Industrial Process Weighing Applications

Strong calibration options and various integration features including Fieldbus interfaces, provides perfect performance for tank, mixer, conveyor scales.

2. Labelling & Data Collecting

BX25 can print different type of standard tickets including totalizing and customized tickets with barcode.

3. Piece Counting

Counting can be done by sampling or average piece weight taken from APW memory. 500 item memory capacity for APW

4. Automatic / Manual Checkweighing

The weight or the quantity of the items in the package on the scale are controlled. 500 item memory for sets of limits.

5. Automatic / Manual Classifying

Products can be classified according to the weight or quantity of item in the package. 500 item memory for sets of limits.

6. Automatic / Manual Gravimetric Filling

Automatic / manual filling can be executed in gross mode or in net mode. 500 item memory for sets of limits.

7. Data Entry Via Barcode, RFID Reader

Direct connection of barcode reader or RFID reader to enter IDs, PT.

BX25 Technical Specifications

Accuracy class & EU type approval	OIML class III, single range, multi range or multi interval
Display	Wide angle LCD display with multicolor backlight, 6 digits 22 mm in height weight display and 16 digits 8 mm in height alphanumeric information display.
Display resolution	Up to 999 999
A/D conversion	24 bit Delta-Sigma ADC with up to 800 conversion rate
Minimum input sensitivity	0.4 µV/d (legal metrology), 0.05 µV/d (industrial)
Analogue input range	-5 mV to +19 mV
Internal resolution	Up to 16 000 000 counts
Calibration	Standard calibration test with test weights eCAL, electronic calibration without test weight, span adjustment of non-empty tanks
Digital filter	5 step adjustable digital adaptive filter and 5 programmable digital dynamic filter
Functions	2 x ID data, ticket number, date & time, total indication Header definitions for IDs as customer, material, quality, color...etc.
Standard applications	Labelling, piece counting, checkweighing, classifying, filling, totalization of the sequential weighing, totalization of the additive items, livestock weighing
Memory	ID1 and ID2 memories, specific tare memory, item limit values memory for basic weighing, filling classifying and checkweighing, average weight of items memory for piece counting. Memory record size is 500 items
SD card	SD card slot for different applications
Programmable keys	3 function keys and 2 touch free keys
Digital inputs	Opto isolated 4 inputs programmable for zeroing, taring, print, Fieldbus controlled input, etc. Inputs are set automatically to certain functions at checkweighing, classifying, filling etc.
Digital outputs	Relay contact outputs are programmable as cut off, Fieldbus controlled output
Data output	Opto isolated 2 pcs RS232C and RS485 (with Modbus RTU), Ethernet TCP/IP and USB
Number of load cells	Up to 8 load cells of 350 ohm or 27 load cells of 1200 ohm
Load cell connection	Connection with 4 or 6 wires. Cable length maximum 1000 m/mm ²
Operation temperature	Between -15°C ~ +55°C max. Legal metrology -10°C ~ +40°C
Humidity	Max. 90 % non condensing relative humidity. Legal metrology max. 80 %
Alibi memory	1 000 000 weighing records
Housing and protection class	Desk top and wall type stainless steel, IP67 protected
Power supply	100 - 240 VAC, 50/60 Hz or 12 - 28 VDC
Options	
Scale options	Second analogue scale input, Alibi memory
Interfaces	Digital 4 inputs / 5 outputs, Analogue output, Profibus, Profinet, CANopen, Modbus TCP, Ethernet TCP/IP, EtherNet/IP, EtherCAT, CC-Link, Powerlink
Accessories	Column mount kit, Wall mount kit, 2D Wall mount kit
